What people are saying about Fashion Feng Shui®

“Fashion Feng Shui® helped me to understand my true self and what I wanted to project to others in a whole new way. With this understanding, I am able to wear more flattering shapes, colours and styles, giving me a new confidence.”

Gail W., Massachusetts

“What a wonderful gift Fashion Feng Shui® has been. Not only has it helped me represent myself better, it has helped me understand myself and others. I am able to make conscious decisions of what to wear that help support any given situation. My personal style has changed dramatically. I understand why I am comfortable in certain colours and silhouettes and I no longer feel obligated to wear what I thought was required.”

Tricia W., California

This workshop not only deepened my understanding of the elements, but my understanding of people. I'm much more appreciative of how our preferred element influences a wide variety of our choices and behaviours. As a result, I connect and communicate more quickly with my clients at a deep level, helping them to honor their personal style in clothing and furnishings.”

Katharine D., Georgia
